Carefully reading it before using the dishwasher will help you to use and maintain the dishwasher properly. Delay start time To display booking time or the Program indicator light when you select washing washing temperature. There are two ways to reduce the water hardness one way is using water softener, the other is using detergent. The hardness of the water varies from place to place. If hard water is used in the dishwasher, deposits will form on the dishes and utensils. The black dot on the rinse aid dispenser indicates the amount of rinse aid in the dispenser. As the rinse aid diminishes, the size of the black dot decreases. This residue can occasionally clog up the filters. The filter system consists of a filter cylinder Coarse filter, A flat Main filter and a microfilter fine filter. Main filter Food and soil particles trapped by this filter are pulverized by a special jet on the lower spray arm and washed down the. To prevent To clean the edge around the door, you should use only a soft warm, damp rag. To prevent penetration of water into the door lock and electrical components, do not use a spray cleaner penetration of water into the door lock and electrical components, do not use a spray cleaner of any kind. The old hoses should not be reused. Water pressure must be between 0,04 MPa and 1 MPa. If the pressure is below the minimum consult our Service Department for advice. <http://ideamoveis.com/datamont/userfiles/98-honda-civic-manual.xml>

Select the product line, the name or code of the appliance you are interested in. Please check your inbox, and if you can't find it, check your spam folder to make sure it didn't end up there. Please also check your spam folder. The back or sides of the dishwasher may be placed up against walls or other furniture units. If the dishwasher is installed near a heat source, fit the special insulating panel to prevent overheating and malfunction of the appliance. To ensure stability, install integrated or builtunder dishwashers only under continuous worktops, and screw them to the adjacent units. To facilitate the installation procedure, the intake and drain hoses can be positioned in any direction; make sure that the hoses are not kinked, crushed or pulled too tightly. This operation is essential for ensuring correct operation of the dishwasher. Make the connection to the domestic hot water supply using the same procedure described for connecting to the cold water supply. It is important to prevent the hose from coming loose and falling.

For this purpose, the plastic support is equipped with a hole for tying it to the wall or water tap. Contents Each product is identified by a unique 16digit code, also called the "serial number", This
